

Needle Guides

Enhancing Accuracy and Speed in CT-Guided Procedures

IZI Medical Products' specially designed Needle Guides reduce procedure time and increase precision in CT-guided pain injections and biopsies. These flat, self-adhesive markers aid in determining needle angle and entry site by providing a clear, accurate reference point with no spray artifacts. IZI Needle Guides are used by neurosurgeons, neuroradiologists and interventional radiologists at leading health institutions around the world.

Product Benefits

- Flat, disposable markers do not indent tissue
- Clear adhesive backing permits visualization of exact marker placement
- Easy-to-read pattern helps identify accurate needle angle and entry site
- Windows allow needle passage
- Wider first line spacing aids orientation
- Thicker center line facilitates counting
- Flexible to contour to the body
- Choice of two sizes provides options for various locations and body types

Product Specifications

Large (NG4010-1)

- Ideal for broader areas such as the back
- Grid measures 3"H x 4"W
- Pattern: series of 7 lines creates 8 access windows
- 15 grids per box

Small (NG4010-2)

- Ideal for smaller areas such as the neck
- Grid measures 1.5"H x 4"W
- Pattern: series of 7 lines creates 8 access windows
- 15 grids per box
